

DOLORES WATERSHED AND RESILIENT FOREST (DWARF) COLLABORATIVE

Wednesday, August 2, 2017, 1:30pm to 3:30pm

Dolores Water Conservancy District, 60 S. Cactus St., Cortez

Please think about:

Do you have activities this summer that you have where you could get people excited about taking responsibility for a resilient Dolores River and forest?

Do you have friends or family in the watershed or in key positions that should become directly involved in DWaRF work?

Expected Outcomes:

- Group Updates including July Field Tour and Forest Partners Social with Regional Forester
- Understanding of post-fire sediment and runoff modeling process and model outputs.
- Agreement on next steps for group and coordinator

AGENDA		
Topic	Process	Time
Updates	Intros, All Updates, Outreach to MCEDA, Dolores, Rico, Regional Forester visit	45m 1:30 PM
Wildfire Risk Assessment Team update	Present, discussion as needed	15m 2:15 PM
Automate Geospatial Watershed Assessment for the upper Dolores	Shea Burns and Dave Goodrich present examples from watershed assessment followed by Q & A via zoom meeting webinar	45m 2:30 PM
Next Steps		15m 3:15 PM
Adjourn		3:30 PM

This meeting will be broadcast for those who want to participate but are unable to attend beginning at 1:30. At 2:15, we will discuss the impetus for the post-fire runoff and sediment modelling and the progress of the modelling via webinar. If not attending in person, you may join from PC, Mac, Linux, iOS or Android: <https://zoom.us/j/257250958> or

via phone at (408)638-0968 Meeting ID: 257 250 958 #

You are encouraged to join a little early if you do not already have zoom meetings set up.
